Lead Mobile Architect and Staff Software Engineer with **12+ years of experience** designing, building, and scaling enterprise-grade mobile and backend platforms across **E-Commerce, Banking, Healthcare, IoT, Media, and Retail** domains. Expert in **Swift, Objective-C, SwiftUI, UIKit, React Native, Node.js, REST APIs, GraphQL, Clean Architecture, MVVM, Dependency Injection, CI/CD, and System Design**. Proven track record leading cross-functional engineering teams, driving architecture decisions, mentoring developers, and delivering high-scale consumer applications. Currently leading a team of **6 engineers** at **Jio Platforms**, delivering platform modernization, performance optimization, AI-powered solutions, and business-critical customer experiences. Recently architected **BeautyAI**, a RAG-based conversational beauty assistant (**React + FastAPI + Groq**) with live product catalog search, streaming responses, and feedback-driven quality loops. Hands-on experience with **Azure DevOps, Jenkins, Bitrise, Firebase, Observability, A/B Testing, GitHub Copilot, Cursor, Claude, and ChatGPT**.

Work History

Lead Software Engineer, Jio Platforms Limited – Bangalore, Karnataka, India June 2022 – Till Date

- Architected and led the end-to-end development of scalable mobile and backend systems, building the **Smart Mirror Enterprise** app from scratch and contributing to the **Tira Beauty** app (App Store).
- Designed and implemented **scalable RESTful APIs using Node.js**, defining robust **API contracts, schemas**, and applying **SOLID principles** and **design patterns** (MVVM, Dependency Injection, Factory) to ensure modular and maintainable architecture.
- Led development of high-impact features including **Referrals, Virtual Try-On, Checkout Revamp, Payments, Offline Orders, Missing Items, and Skin Analyzer**, ensuring performance, scalability, and seamless user experience.
- Improved application performance through **profiling and memory optimization using Instruments (Time Profiler, Allocations, Leaks)**, reducing **cart load time from 9s to 3s** and optimizing app startup time by **18%**.
- Established end-to-end **observability and experimentation frameworks using Firebase (Crashlytics, Analytics), Sentry, and Amplitude**, enabling real-time logging, crash reporting, user behavior tracking, and **A/B testing** for data-driven decision making.
- Drove **cross-platform strategy using React Native (Metro)**, improving development velocity and maintainability.
- Shipped **In-App Ratings** prompts and **Truecaller-based one-tap verification**, lifting review volume and streamlining onboarding with reduced login drop-off.
- Collaborated cross-functionally in Agile teams to influence **system design, technical decisions, and delivery strategy**, ensuring high-quality and timely releases; leveraged **AI-assisted development tools (Cursor, Claude, ChatGPT, GitHub Copilot)** to enhance productivity and code quality.
- Optimized **cart operations (product add, update, delete)** and improved critical user journeys such as checkout, contributing to App Store rating growth from **3.7 to 4.0**.
- Recognized with “**Comeback Kid**” and “**On The Spot**” awards for outstanding leadership and impact.

Specialist Software Engineer, Allegion India Private Ltd. – Bangalore, Karnataka, India Sep 2021 – June 2022

- Developed enterprise-scale IoT access-control solutions integrating BLE-enabled smart locks with Azure Cloud.
- Built reusable iOS SDKs for device provisioning, access management, and lock operations.
- Collaborated with Firmware, Backend, and Product teams on API design, code reviews, and Agile delivery.

Senior Software Engineer, Globant India Private Ltd. – Pune, Maharashtra, India Feb 2018 – Sep 2021

- Developed mobile banking applications for **Openbank Spain** and **Openbank U.S.**
 - Openbank Banca Móvil (Spain)
 - Openbank U.S.
- Built IoT and smart-home applications using **Xamarin.Forms**, BLE, and connected devices.
 - Lightify IoT App
- Developed healthcare AR solutions using **ARKit** and reusable frameworks using **SPM** and **Carthage**.
- Contributed to media applications for Disney parks.

- Hong Kong Disneyland
- Disneyland US

Software Engineer, Tata Consultancy Services – Pune, Maharashtra, India

June 2014 – Feb 2018

- Developed multiple healthcare and support apps for **Pfizer** using Objective-C and Swift, including:
 - LivingWith™: Cancer Support
 - IG Companion
 - HemMobile
- Built a 2D gaming app using **SpriteKit** and contributed to apps supporting addiction recovery and cancer care with localization support for various regions using Objective-C.
- Integrated third-party frameworks such as **Google Analytics**, **Alamofire**, **Urban Airship**, and **Google Maps** to enhance functionality.
- Worked closely with business teams on design, planning, estimation, and handled full lifecycle development, including bug fixing and CRs.

Projects

BeautyAI — Conversational AI Beauty Assistant (MVP)

2025 – Present

beautyai-frontend.onrender.com | React | FastAPI | Groq LLMs

- Architected a **ChatGPT-style beauty-domain assistant** powered by **Groq GPT-OSS 120B/20B**, with **SSE streaming responses**, guardrails, and LLM tool calling for safe, grounded conversations.
- Implemented **RAG over a live product catalog** so answers reference real products, rendered inline as interactive product cards with images and pricing.
- Built a **thumbs-down / neutral / thumbs-up feedback loop** feeding a labeled dataset, with **Langfuse** tracing and **Prometheus** metrics for observability and continuous quality improvement.
- Persisted chat sessions in **SQLite** with **LLM-generated conversation titles**; deployed the full stack on Render.

Technical Skills

Agile, Solid Principles, Dependency Injection, CI/CD, Jenkins, Bitrise, Swiftlint, CocoaPods, SPM, Carthage, REST, XML, Memory Management, Auto Layout, GraphQL, Jazzy documentation, SonarQube, RAG, tool calling, prompt engineering, guardrails, Langfuse, Prometheus / Grafana

Coding Language

Proficient: Swift, Objective-C

Familiar: React, TypeScript, React Native, Dart, Python, Kotlin, NodeJS, Java, Shell Script, Apple Script, C#, C, C++ , Django

Frameworks

Cocoa Touch, CoreData, Realm, XCTest, Foundation, UIKit, SwiftUI, MapKit, HealthKit, Core Location, Core Animation, SpriteKit, ARKit, PromiseKit, Alamofire, Moya, Bluetooth (BLE), PerfectCorp, Segment, MoEngage, Facebook Analytics, AppsFlyer

Full-Stack & Cloud

Node.js, FastAPI, Django, REST, GraphQL, MongoDB, SQLite, Firebase, Azure, SSE / WebSockets
